## DESCRIPTION

Suspension lamp for diffused lighting. Injection-molded opal acrylic diffuser with semi-gloss finish. Painted or galvanized metal structure. Painted polycarbonate top cover matching the color of the structure. Steel support cable, white or transparent PVC covered power cord. Led version equipped with SMD Led circuit with high color rendering index (CRI90) and high-energy efficiency. Printed metal dissipating plate. Built-in electronic ballast. DM version equipped with dimmable ballast with DALI/PUSH interface. All electronic ballasts are equipped with thermal and short-circuit protection, against mains overvoltage and overloading.

DESCRIPTION

System for the installation of multiple suspensions consisting of several lighting points. This structure allows free and independent installation of each light point, where the layout and length of the cable can be adjusted as desired. It requires only one ceiling supply point and is easy to install. The suspensions installed with this system must be purchased separately, in addition to the kit, and are wired with 3 meters of cable.
